

White Mantis- Workshops

SEED TO CUP WORKSHOP

Discover the complete journey of coffee — from the farm to your cup.

What Participants Will Learn

1. Coffee Farming & Origin

How coffee is grown, types of varieties, altitude, and harvesting methods.

How different countries and terroirs influence flavor profiles.

2. Processing Methods

Natural, Washed, Honey — how each process changes the final taste.

A visual breakdown of the journey from coffee cherry to green bean.

3. Roasting Journey

What happens to coffee beans during roasting.

Light, medium, and dark roasts — how they impact aroma, acidity, and body.

4. Brewing Fundamentals

Brewing ratios, grind size, water temperature, and extraction basics.

Hands-on brewing practice with methods like V60, French Press, AeroPress, or espresso (optional).

5. Cupping Session

How professionals taste and evaluate coffee.

Identifying flavor notes, sweetness, acidity, body, and aftertaste.

6. Sustainability & Traceability

Why traceable coffee matters.

The impact of direct trade and supporting farmers.

Why Join This Workshop?

Perfect for beginners, baristas, coffee enthusiasts, and business owners.

Improve your tasting and brewing skills.

Understand coffee deeply — not just how to brew it, but the long journey behind every cup.

What Participants Receive

Certificate of completion
Goodie bag (sample beans)
Workshop booklet
Access to our coffee learning community

BARISTA FOUNDATION WORKSHOP

Your first step into the world of professional coffee making.

What This Workshop Covers

1. Introduction to Coffee

Basic understanding of coffee origins, varieties, and processing.
How these factors influence flavor in the cup.

2. Espresso Fundamentals

What espresso is and how extraction works.
Understanding dose, yield, brew ratio, and extraction time.
Hands-on practice pulling consistent espresso shots.

3. Milk Steaming & Texturing

How to steam silky, glossy milk.
Techniques for creating basic latte art (heart, tulip for beginners).
Understanding milk temperature and how it affects flavor.

4. Grinder Operation & Calibration

How to adjust grind size based on espresso flow.
Maintaining grinder cleanliness and workflow.

5. Coffee Equipment Basics

Introduction to espresso machines, grinders, and brewing tools.
Daily cleaning and maintenance routines for a safe, clean station.

6. Café Workflow & Service Etiquette

How to work efficiently behind the bar.
Basic customer service principles.
Building confidence as a new barista.
